

RHODE ISLAND HAZARDOUS WASTE GENERATOR AND DOT HAZARDOUS MATERIALS TRANSPORTATION SEMINAR

October 25, 2017 • 7:30 AM-5:00 PM

Cost: \$500 (Coffee, snacks, and lunch provided)

Location: Amtrol Center for Education, 1400 Division Road, West Warwick, RI 02893

WOODARD & CURRAN ONE-DAY SEMINAR:

RI HAZARDOUS WASTE GENERATOR AND DOT HAZARDOUS MATERIALS TRANSPORTATION

Hazardous waste generators in Rhode Island are required to receive training in accordance with Rhode Island Department of Environmental Management (RIDEM) Hazardous Waste Regulations. This class will provide the training required by Rule 5.13(l) of the RIDEM hazardous waste regulations (except for site-specific training elements), by explaining what you need to do to comply as a generator in Rhode Island. In addition, the US Department of Transportation (DOT) requires training and testing every three years for employees who ship hazardous materials. This class also meets DOT training requirements in accordance with 49 C.F.R. 172 Subpart H and will explain what you need to do to comply with requirements for hazardous materials shipments by highway for common hazardous materials (not including special requirements for explosives, radioactives, and packaging cylinders).

PRESENTATION TOPICS

Waste Characterization: Determining whether wastes are hazardous; excluded, listed, and characteristic wastes; state-regulated wastes.

Generator Status & Notification/EPA ID Numbers: Includes information on how to determine your generator status as conditionally exempt small quantity generator (CESQG), small quantity generator (SQG), or large quantity generator (LQG) in Rhode Island.

Hazardous Waste Onsite Management Standards: Satellite accumulation, 90-day/180-day storage, labeling, container management, tank standards.

Emergency Response Planning and Training: Contingency plan, emergency preparedness and prevention, training requirements, written training plans.

Universal Waste Management Standards: Rhode Island Universal Wastes, prohibitions, handler requirements, labeling, storage requirements.

Used Oil Management Standards: Rhode Island used oil regulations, onsite management, burning used oil.

Shipping Hazardous Materials, Including Hazardous Wastes, Offsite: Discussion of DOT hazard classification, choosing shipping descriptions, preparation of shipping papers/uniform hazardous waste manifests, and land disposal restrictions.

Preparing Hazardous Materials and Wastes for Shipment: DOT packaging, marking, labeling, and placarding requirements.

DOT Planning, Training, and Registration: DOT requirements for security planning, registration, and training.

TO REGISTER

Contact **Debbie Moriarty** to register:
(401) 427-1135 or (800) 985-7897;
dmoriarty@woodardcurran.com

Technical questions, call Kristina Richards
(401) 427-1472; krichards@woodardcurran.com

CLASS HANDOUTS

- ▷ Course manual, including a narrative description of the requirements for each topic with copies of slides used during presentations
- ▷ Excerpts of selected hazardous waste/DOT regulations
- ▷ Emergency Response Guidebook
- ▷ Electronic copies of check lists, inspection logs, and other tools that you can use at your facility to facilitate compliance

CONTINUING EDUCATION CREDITS

IHMM – Meets the requirements as a qualified activity under IHMM's Recertification Program for the CHMM credential. Participants are eligible for 1 CMP for each hour of contact time.

ABIH Industrial Hygiene CM Points – This event contains approximately 8 hours (or CEUs) of technical contact time and is eligible for ABIH CM credit.

POSSIBLE PRESENTERS

- ▷ Kelly Camp, CHMM, CPEA
- ▷ Kristina Richards, CPEA
- ▷ Kelly Cowan, P.E.
- ▷ Brian McGrath, CHMM, CPEA

At the conclusion of the training, a DOT test will be administered to satisfy the requirements of 49 C.F.R. 172 Subpart H. Attendees who choose to take the test and get a passing grade will receive a certificate documenting successful completion of training and testing in accordance with 49 C.F.R. 172.704(a)(1) through (4).
